

MH32F, MH42F: Control valve with flange connection, PN 6

How energy efficiency is improved

Supply from both sides and the linear characteristic enable energy-efficient working

Areas of use

Continuous control of the supply temperature in heating systems in which a certain loss through leakage is desired.

Features

- MH32F: 3-way valves with nominal diameters DN 20...150
- MH42F: 4-way valves with nominal diameters DN 32...50
- Can be combined with the ADM 322 and ASM 105, 115, 124 motorised actuators
- Manual adjustment via lever
- Body made of grey cast iron; brass gate
- Spindle made of brass up to DN 25 and stainless steel from DN 32
- Stuffing box with double O-ring guarantees the tightness of the seal at the spindle

Technical data

Parameters		
Nominal pressure	6 bar	
Angle of rotation	90°	
Valve characteristic	Linear	

Ambient conditions		
Operating temperature	2...110 °C	
Operating pressure	Max. 6 bar	

Overview of types				
Type	Nominal diameter	K _{vs} value	Leakage rate in % of K _{vs}	Weight
MH32F20F200	DN 20	12 m³/h	1 %	2.7 kg
MH32F25F200	DN 25	18 m³/h	1 %	3.5 kg
MH32F32F200	DN 32	28 m³/h	1 %	4.6 kg
MH32F40F200	DN 40	44 m³/h	1 %	5.6 kg
MH32F50F200	DN 50	66 m³/h	1 %	7.9 kg
MH32F65F200	DN 65	100 m³/h	1 %	9.2 kg
MH32F80F200	DN 80	150 m³/h	1 %	14.2 kg
MH32F100F200	DN 100	225 m³/h	1 %	19 kg
MH32F125F200	DN 125	310 m³/h	1 %	25.8 kg
MH32F150F200	DN 150	420 m³/h	1 %	35.5 kg
MH42F32F200	DN 32	28 m³/h	1.5 %	5.7 kg
MH42F40F200	DN 40	44 m³/h	1.5 %	7.1 kg
MH42F50F200	DN 50	66 m³/h	1.5 %	8.3 kg

-  MH32F20...25: 3-way valve: Zinc cover, brass spindle
-  MH32F32...150: 3-way valve: Cover of grey cast iron, spindle of stainless steel
-  MH42F32...50: 4-way valve: Cover of grey cast iron, spindle of stainless steel

Combination of MH32F/MH42F with electric actuators

i *Warranty: The technical data and pressure differences indicated here are applicable only in combination with SAUTER valve actuators. The warranty does not apply if used with valve actuators from other manufacturers.*

i *Definition of Δp_s : Max. admissible pressure drop in the event of a malfunction (pipe break after control valve) at which the actuator reliably closes the control valve using the return spring.*

i *Definition of Δp_{max} : Maximum admissible pressure drop in control mode at which the actuator reliably opens and closes the valve.*

Cannot be used as distribution valve

 Accessories required: Assembly materials; see accessories. With ASM 124, it is not possible to fit auxiliary contacts or a potentiometer

Description of operation

When the spindle is turned, the hot-water inlet is opened continuously and the cold-water inlet (heater return flow) is closed to the same degree. As a result, the temperature of the mixed water increases (heating supply) with a practically constant flow rate.

When the hot-water inlet is closed, a by-pass to the boiler return is simultaneously opened at the 4-way valve so that thermal circulation is possible.

A reversible actuator with a 90° angle of rotation is suitable for automatic activation. After the coupling is disengaged, the gate can be adjusted manually.

Intended use

This product is only suitable for the purpose intended by the manufacturer, as described in the “Description of operation” section.

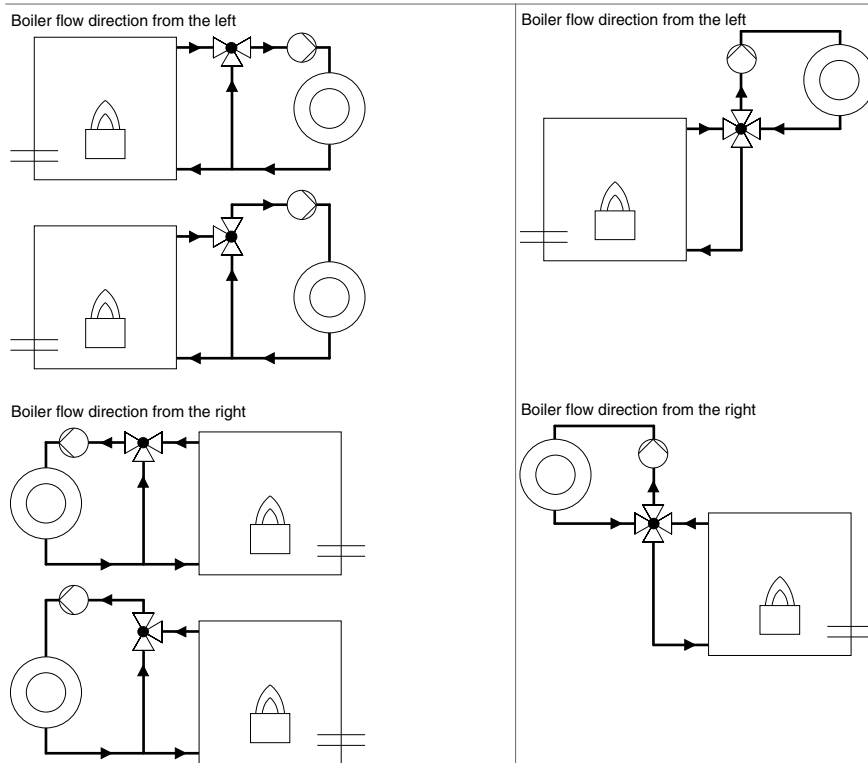

All related product regulations must also be adhered to. Changing or converting the product is not admissible.

Additional technical data

Body dark grey, RAL 7021. Flange as per VSM 18643 (DIN 2501). Threaded holes for mounting the console and the motorised actuator. Lever for manual adjustment made of steel with plastic handle. Scale labelled on both sides for the installation types: Boiler supply from left or boiler supply from right.

Engineering and fitting notes

Requirements for water quality as per VDI 2035.

Disposal

When disposing of the product, observe the currently applicable local laws.

More information on materials can be found in the Declaration on materials and the environment for this product.
