# **KNX USB SC**

## ZSYUSBSC

### **Technical Documentation**

#### FEATURES

- Maximum APDU length supported: 220 bytes.
- USB 2.0 with cEMI protocol is supported.
- Secure KNX communication.
- Integrated KNX BCU.
- Dimensions 36 x 94 x 70mm (2 DIN units).
- DIN rail mounting (EN 50022), through pressure.
- Conformity with the CE directives (CE-mark on the back side).

**Important:** To make ETS detect the KNX-USB Interface after connecting it to the PC, it might be necessary to either import its Application Program in ETS or install the driver. Both files can be downloaded from page www.zennio.com: Products > System > KNX USB SC.

GENE	RAL SPECIFIC	ATIONS		
CONCEPT			DESCRIPTION	
Type of device			Electric operation control device	
KNX supply	Voltage (typical)		29VDC SELV	
	Voltage range		2131VDC	
	Maximum consumption	Voltage	mA	mW
		29VDC (typical)	5	145
		24VDC <sup>(1)</sup>	10	240
	Connection type		Typical TP1 bus connector for rigid cable 0.80mm Ø	
External power supply			Not required	
Operation temperature			0°C to +45°C	
Storage temperature			-20°C to +55°C	
Operation humidity			5 to 93% RH (no condensation)	
Storage humidity			5 to 93% RH (no condensation)	
Complementary characteristics			Class B	
Protection class				
Operation type			Continuous operation	
Device action type			Туре 1	
Electrical stress period			Long	
Degree of protection			IP20, clean environment	
Installation			Independent device to be mounted inside electrical panels with DIN rail (EN 50022)	
Minimum clearances			Not required	
Operation indicator			The USB connection indicator LED blinks (green) in the presence of USB communication. The KNX connection indicator LED blinks (green) when KNX communication occurs.	
Weight			60g	
PCB CTI index			175V	
Housing material			PC FR V0 halogen free	

<sup>(1)</sup> Maximum consumption in the worst case scenario (KNX Fan-In model)

# $\triangle$

- Installation should only be performed by qualified professionals according to the laws and regulations applicable in each country.
- Do not connect the mains voltage nor any other external voltage to any point of the KNX bus; it would represent a risk for the entire KNX system. The facility must have enough insulation between the mains (or auxiliary) voltage and the KNX bus or the wires of other accessories, in case of being installed.
- Once the device is installed (in the panel or box), it must not be accessible from outside.
- Keep the device away from water and do not cover it with clothes, paper or any other material while in use.
- The WEEE logo means that this device contains electronic parts and it must be properly disposed of by following the instructions at http://zennio.com/weee-regulation.
